

ADVANCED HANDLOADING

“Advanced Reloading Techniques”

These classes are conducted by Stuart and Annie Elliott as part of their BRT courses.
www.benchresttraining.com ph [3808-4862](tel:38084862) email [<stuart@benchrest.com.au>](mailto:stuart@benchrest.com.au)

This course is an extension of our basic reloading course and is for those who are looking into more advanced areas of reloading ammunition. The focus is mainly on rifle cartridges and therefore would interest people involved in all forms of Rifle Shooting Competitions including Benchrest but also is for reloaders who just want to develop the best they can for any particular rifle. This course includes theory and practical demonstrations as well as discussions on special equipment and troubleshooting and assumes a good basic understanding of general ammunition reloading techniques.

Some of the course subjects will include:

- ‘Wildcat cartridges’- What are they?
- Measurement
- Measuring instruments and gauges
- Other tool and special dies
- Reloading presses
- Books and manuals
- Cartridge case prep.
- Outside neck turning and inside neck reaming
- Bullet testing, measuring and selection
- Troubleshooting and problems

Course notes will be provided and a certificate of attendance upon completion. There will be *PowerPoint* presentations, notes and illustrations plus practical demonstrations.

Courses are currently conducted at the QLD Gun Exchange in Brisbane and also at The Barn in Oakey near Toowoomba, QLD.
